Memo To: Simon O'Shea
From: G. L. Brodsky
Subject: Alternative "Scope of Coverage" Project

The following information refers to Scope of Coverage memo dated February 20, 1967.

- I. 2) Re: Nicotine used merely as a reference compound or in papers where a known nicotine effect is used as a standard test system.

The number of articles in this category, based on one month's scanning is 68. The cost to include these articles in the "listed method" is approximately \$200 per month.

- II. Alternative suggestion 1) Re: Etiology and Epidemiology-Cancer

The number of articles that would be added to the system over that already being put into the system is 160 per month, based on one-month's scanning. The cost to list these articles is approximately \$450 per month.

- II. D. 1) Re: Miscellaneous no-tobacco references.

The number of articles added to the selections after the limitations were removed, i.e., only U.S. authors, etc., is 65 per month. The cost to list all articles in this category (120 per month) is approximately \$400 per month. This is a reduction in cost of approximately \$500 per month.

Overall added coverage of approximately 293 articles will cost additional \$150 per month.
